

BROILER CHICKEN WELFARE

Our goal is to work with our suppliers and accomplish the following by 2024 for 100% of our chicken:

- Transition to strains of birds that demonstrate higher welfare outcomes that meet the criteria of the Global Animal Partnership (GAP).
- Provide birds more space and reduce stocking density in barns to 6 lbs/sq. foot in accordance with GAP Standards.
- Enhance the birds' living environments, including litter, lighting, and enrichment that meets GAP standards.
- Ensuring birds are rendered unconscious using multi-step controlled atmospheric stunning.
- Demonstrate compliance with all standards via third-party auditing.
